Liquid Solutions AquaShield 5500 Reverse Osmosis Purifier

How It Works

Reverse Osmosis technology is the most cost effective, state-of-the-art process for in-home water purification.

The **Liquid Solutions AquaShield** uses a 4-filter, 5-stage system to ensure unsurpassed quality and performance.

The **AquaShield** operates on household water pressure and automatically turns on and off based on usage.

The **AquaShield** uses a Thin-Film Composite TFC membrane for maximum contaminant rejection, long service life, and great tasting water.

Filter changes are quick and simple with sanitary quick change "SQC" slim-line factory sealed cartridges.
